

Navisworks Manage- All Disciplines

Introduction

- Navisworks Essentials Course provides a comprehensive understanding of the fundamental features and tools integrated into the Navisworks software suite.
- Participants gain the expertise to proficiently oversee and manage collaborative construction projects, utilizing Navisworks for enhanced visualization and coordination of Building Information Models (BIM).
- The course places a strong emphasis on hands-on exercises and practical examples, enabling students to harness Navisworks effectively for streamlined project collaboration, clash detection, and documentation.

Learning Outcomes

- Gain a comprehensive understanding of the essential features and tools inherent in the Navisworks software suite.
- Enhance proficiency in creating and managing Building Information Models (BIM) within the collaborative Navisworks environment. Hone effective skills in documentation and collaboration, enabling participants to leverage Navisworks for seamless project communication, coordination, and clash detection.

Why Choose Skill Hub Academy ?

- Industry-Focused BIM Training with real-world project workflows
- Expert Mentors with practical experience in global AEC projects
Hands-On Learning using Autodesk Revit, Navisworks & BIM tools
- Career Support & Skill Development to help students grow professionally.

Essential Course Details

20 Hrs. Training

1 Hrs. Daily on weekdays and
4 Hrs. on one weekend
1 Hrs. Offline class

Target Audience:

This course is tailored for beginners, CAD drafters, project coordinators, architects, and project managers seeking to enhance their skills in effective project coordination and visualization. Additionally, it is well-suited for engineering and architectural final-year students who are eager to acquire practical training in Navisworks for real-world applications, especially in the areas of clash detection and coordination.

Training includes:

- Delve into Navisworks tools for proficient project coordination and visualisation.
- Learn to create project organizations and Navigate through Common Data Environments (CDE) for streamlined data management.
- Acquire skills in setting up projects and users while mastering Navisworks for enhanced collaboration and coordination in the cloud environment.

Course Certificate:

Upon completion of the Autodesk Course, Completion Certificate will be provided.
